

TerraMar Freestyle App

The Freestyle App offers useful tools for drivers and field workers: a simple solution for logging mandatory vehicle check information; and / or a convenient method of recording sites of interest. In each case, the information gathered on the App is efficiently uploaded to tracpoint, TerraMar's asset tracking and fleet management software.

Key features:

Vehicle Check Module:

- Complete vehicle check daily/weekly and record any defects
- Customise your check-list to suit your vehicles and equipment
- Add comments and/or photos to each defect
- Information fed directly to your tracpoint account

Save Location Module:

- Capture your location and check whether it already exists as a Waypoint on tracpoint
- Set a name and size for a new Waypoint
- Send the details directly to your tracpoint account

This is a fully maintained app, which will be managed and updated by TerraMar Networks Ltd.

All app users must be associated with a live tracpoint account, and must be provided with login details from the system administrator.
